EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2024-2028	Bachelor of Engineering (Computer Science and AI)	Newton School of Technology, Rishihood University	7.56/10.0
2022-2024	Intermediate (Class XII)	Sri Chaitanya Junior Kalasala	9.3/10.0
2021-2022	Matriculation (Class X)	Sri Chaitanya Techno School	9.8/10.0

INTERNSHIPS

AI/ML Engineering Intern June 2026 - August 2026
Sphere Global *Remote*

- Built a Python evaluation platform for PRISM damage detection with **12 REST endpoints** for inference and testing.
- Cut false positives by **35%** across 4 detection models; built a dashboard recomputing TP/FP/FN in **under 10 ms**.
- Served all 4 detection models concurrently on CPU-only hardware within **3 GB RAM at 1.5 s per image**.
- Built a tiled inference pipeline splitting **4K images into 15 overlapping crops** so the models catch small surface defects.

Software Engineer Intern June 2025 - October 2025
Thoughtiv *Hyderabad*

- Built backend **REST APIs** and data pipelines for a full-stack automation platform covering scraping and NLP.
- Built scraping modules and a JavaScript **Chrome extension** that automated manual tasks, cutting task time by **80%**.
- Replaced brittle keyword matching with a **Python spaCy NER** pipeline for more accurate, reliable entity extraction.
- Improved document processing efficiency by **40%** under CPU-only constraints, benchmarked on a **500**-document test set.

PROJECTS

Sablegate AI (Github) October 2026

- Built an open-source security gateway in **Python/FastAPI** between apps and LLM providers handling financial data.
- Detected Aadhaar, PAN, IFSC and Luhn-validated card numbers at **100% recall** on a 250-sample synthetic benchmark.
- Built a tamper-evident audit ledger with **SHA-256 hash chains** and Ed25519-signed Merkle checkpoints.
- Handled **1,200 req/s** per instance at **2.5 ms p99** added latency, with per-key rate limits and monthly budgets.
- Added per-provider circuit breakers (OpenAI, Anthropic, Gemini) with failover **under 500 ms** and **0 client errors**.

Portside – Container Orchestrator (Github) September 2026

- Built a Kubernetes-style orchestrator in **TypeScript** with a **gRPC** control plane, YAML specs and 3 worker nodes.
- Validated with **Vitest** unit tests, **fast-check** property tests and a **chaos harness** on a 3-node cluster.
- Built a reconcile loop that restarts crashed containers and reschedules workloads off failed nodes **within 5 s**.
- Added health-checked rolling deployments (**0 failed requests** in a 10-replica rollout) and **SQLite** state recovery.

CERTIFICATIONS

Full-Stack Development Bootcamp Alfaleus Technology × IIT Hyderabad (Link) July 2025

- Selected in top 10% of 1,200+ applicants; built full-stack automation, Chrome extension and web-scraping projects

SKILLS

- **Databases & Data Tools:** NoSQL, MySQL, MongoDB, PostgreSQL
- **AI / ML:** RAG, Machine Learning, Transformers, LangChain, GenAI, LangGraph, Hugging Face, PyTorch, Natural Language Processing, LLM
- **APIs & Testing:** API, FastAPI
- **Computer Language:** TypeScript, HTML, CSS, JavaScript, Python, SQL
- **Frameworks & Libraries:** Tailwind CSS, OpenCV, Next JS, NumPy, React, Node.js, Bootstrap, Express JS, Pandas
- **Core CS:** Data Structures and Algorithms, DBMS, Computer Networks

ACHIEVEMENTS

- Reliance Foundation Undergraduate Scholar: merit-based scholarship awarded for academic excellence.
